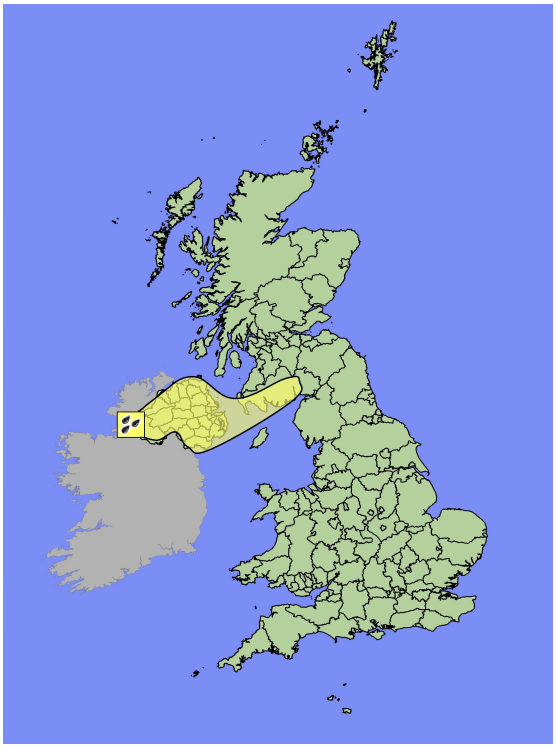
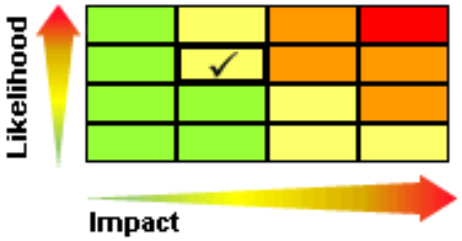
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system will move up across Northern Ireland and southern Scotland during Tuesday evening, this clearing north later on Wednesday. Over Northern Ireland widespread totals of 20-30 mm are expected and locally more than 40 mm possible, especially over the high ground. Over Dumfries and Galloway totals will be around 40 mm with 60 mm possible over the high ground. With increased holiday traffic and outdoor activities, the public are advised to be aware of the risk of some disruption due to localised flooding.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **18:00 on Tue, 31st Jul 2012** until **15:00 on Wed, 01st Aug 2012**

An area of rain will move up across Northern Ireland and southwest Scotland through Tuesday evening, overnight and into Wednesday, turning heavy at times.
